

GETTING CLOSER

A people
company

HELPING BETTER

One of our greatest strengths is that for all our growth, we are still a family-owned company that takes on responsibility. Humanity, close contact and personal responsibility are the values lived up to by a big team that is willing to keep on changing and improving.

Our staff are required to make their own decisions and help shape our company. This is the best foundation for showing what we are capable of and developing products that serve to improve human well-being.

Our vision – our mission

Our actions are only strong and credible if we **keep our promises**. Our goal is to support our fellow human beings by serving them as partners. Partners who **are familiar with their needs** and know **how best to help** them.

We are responsible!

We are result-oriented!

We are customer-oriented!

We enjoy what we do!

Our company – our performance

WÖRWAG Pharma also strives for **profitable growth** and **improved performance**. After all, a company is only strong if its performance is on track. At the same time, we want to do things our way. For us, growth is not just an end in itself; it also has to fit in with the way we see ourselves. International, but independent.

Globally active with a **large team**, but always **focusing on the individual**. Close to people’s needs, and consequently successful in the long term. Our **product range** is the basis of our success: products that treat diabetic comorbidities and pain/neuralgia.

Revenue development
2009 – 2019 (in EUR million)

Managing Directors Jochen Schlindwein,
Monika Wörwag and Gerhard Mayer

Our company – our team

It's easy to **identify** with something when you have made a significant contribution to it. This is why we encourage personal responsibility and an entrepreneurial mindset among our staff. **Closeness, equality, team spirit** and the feeling of being **part of a family** are what make the cooperation among our large team so successful.

Flat hierarchies improve our efficiency when finding solutions, and together we tackle our challenges with **motivation** while remaining **conscious of our values**. The fact that we have not forgotten our **origins** and still adhere to this philosophy today makes us strong, even though we are now a globally active company.

60

sales reps in Germany

1996 Russia (Moscow) Czech Republic (Hradec Králové)	2004 Ukraine (Kiev)	2009 Uzbekistan (Tashkent) Turkmenistan Tajikistan	2018 Thailand (Bangkok)
1998 Romania (Cluj-Napoca) Baltic States (Riga)	2005 Kazakhstan (Almaty) Moldova (Chisinau) Hong Kong	2020 The Philippines	

Our focal areas

Diabetic comorbidities and secondary diseases

Our biofactors are setting new standards.

Pain/neuralgia

Strengthening the metabolism with biofactors: vitamins, minerals, trace elements

Lifestyle diseases: treatment and prevention

Our aspirations – our quality

WÖRWAG Pharma develops innovative approaches to treatment. We focus on the consequences of **diabetes** such as **diabetic neuropathies** by organising international clinical studies, expert meetings and symposiums and cooperating closely with research laboratories.

Particularly the active ingredient benfotiamine, which was developed further by company founder Dr. Fritz Wörwag and became a **milestone** in the treatment of **diabetic comorbidities**, is more important today than ever. It provides protection against the vitamin B1 deficiency common among the ever-increasing number of diabetes patients.

Our commitment is shaping the future.

The Fritz Wörwag Research Prize is awarded to scientists and researchers who are working on clinical applications for biofactors.

the German Diabetes Centre,
Heinrich Heine University, Düsseldorf

Our responsibility – our customers

We treat our partners, the doctors and pharmacists, in the same way as we treat individual patients – **on a one-to-one basis** and always on an **equal footing**. We want our partners not only to count on the powerful, effective medicines produced by Wörwag Pharma but also to rely on our **personal support, expert advice** and **dedicated service**.

What's more, there's one thing that is particularly important to us: mutual exchange. With the goal of furthering our common interest: the **well-being of our patients**.

Active ingredient benfotiamine:
protects diabetic patients from
vitamin B1 deficiency.

Our responsibility – our commitment

We take more responsibility – beyond supplying patients with effective medication. Since 1997, we have been supporting various **humanitarian aid projects** organised by the Herrnhuter Missionshilfe (Moravian Church) in **Tanzania** and **Zambia**.

We take a special interest in projects to construct vocational schools: WÖRWAG Pharma has already covered most of the costs of building and equipping **four vocational training centres**. Here young people can train as tailors, joiners, electricians or computer specialists – thus giving them the **chance** to lead independent lives.

Students' residence in Namtumbo

Opening ceremony of new school with Dr. Marcus Wörwag in December 2016

New vocational training centre in Ndola, Zambia

Teachers and pupils in Kakozi
